**What are the Necrons?** The Necrons are an ancient dying race that were deceived into sealing their souls into automatons 60 million years ago. They are slowly re-emerging from their slumber to begin the next cleansing of all life forms in the Galaxy.

**Army Difficulty 1-5:** 1. The army itself is very straightforward with limited, but effective, weapon options. The leadership abilities are all very simple to apply.

**Strengths:** Excellent tough infantry with good saves and the ability to Reanimate upon their demise. Their vehicles are either heavily armoured or Quantum Shielded, and are self-repairing, making them one of the most defensive armies in the 40 universe.

**Weaknesses:** Most units move slowly and have low initiative, making it difficult for them to maintain damage output in ongoing melee fights. Only some specialist units can respond quickly to the rapidly changing objectives in game, making foresight an important tool for a Necron Player.

**Army Abilities:** The Necrons have several unique abilities that are fielded throughout their codex. They are listed here for easy reference.

- **Canoptek** – This model does not suffer the Autowounds from losing Combat Resolution as a Fearless model. If this model is part of a unit that does not have the Canoptek keyword, the unit still takes the Autowounds (ignoring this model if any bleed over).
- **Hardwired for Destruction** – This model may reroll 1's To Hit.
- **Living Metal:** Models with Living Metal Heal 1 Wound up to their Starting Wounds on their profile during each of your Command Phases. A model cannot Heal more than once per Turn unless a special rule says otherwise.
- **Quantum Shield:** Units with Quantum Shield treat all Armour Facings as 13 instead of the Datasheet value until the first Penetration. Resolve all Hits from the unit that penetrates this Shield simultaneously. After this, the Datasheet FA, SA, and RA are used for the remainder of the game.
- **Reanimation:** Everything Infantry or Monstrous Infantry in this codex has the ability to Reanimate. If a model with Reanimation is slain, do not remove the model from the table. We recommend laying it on its side, because it cannot be targeted or cause Hits on its unit for the rest of the phase. At the end of each Phase, regardless of whose turn it is, roll a d6 for each model Slain. On a 5+, the model gets back up and resumes fighting!
- In the case of multi-Wound models, roll a d3 for each. The net total of the unit heals this many Wounds in restored models, but the d3 total each cannot exceed the maximum Starting Wounds of the model being Reanimated (For example, a W2 model may not contribute 3 Wounds to the unit's Reanimation. Any result in a 3 in this case is capped at 2).
- **Soulless Machines:** Models with this rule may not willingly Go To Ground. One of the few exceptions would be if a unit with this is forced to Go To Ground after being forced to Disembark of a multi-level Terrain Piece from a level above the ground, or from a wrecked Transport that does not use Teleporters.

### **Common Wargear**

In order to reduce redundancy throughout the Codex, common Wargear upgrades for units and models will be included here for your quick reference.

- **Canoptek Plasmacyte** - 6" Aura, target unit with Hardwired for Destruction Rule gains S+1, A+1. Roll a d6. On a 1, one model with this rule is removed from the game. It cannot reanimate or return in any form.
- **Chronometron** – 6" Aura, this model and target unit gain a 5+ Invulnerability Save.
- **Counter temporal Nanomines** - 18" Aura, target unit only charges and advances at half speed.
- **Cryptogeometric Adjuster** - 18" Aura, target unit only charges and advances at half speed.
- **Dimensional Sanctum** - This model and its unit gain Deepstrike.
- **Gloom Prism** - May attempt one Deny the Witch per Psychic Phase at Psychic Mastery Level 0.
- **Hyper Material Ablator** - 6" Aura, target unit gains a 5+ Cover Save.
- **Mind Shackle Scarabs** - 6" Aura, target non-Titanic model in a Challenge with this model suffers -1 To Hit.
- **Phase Shifter Generator** – This model gains a 4+ Invulnerability Save.
- **Photon Transubjector** - This model ignores the First Wound Suffered per Phase
- **Prismatic Obfuscatron** - 6" Aura, this model and target unit may only be targeted if they are the closest unit to the attacker.
- **Resurrection Orb** - 6" Aura, this model and one unit within 6" may roll Reanimation twice in your Command Phase. One Use Only.
- **Sempiternal Weave** – This model gains W+1.
- **Sepulchral Scarabs** - Each of your Command Phases roll d6. On a 5+, Heal one additional Wound. This ignores the normal Heal rules.
- **Timesplinter Mantle** – This model gains a 4+ Invulnerability Save.

### Dynasties

There are many fractured Necron Empire territories across the galaxy. The following rules allow you to specialize your existing army or to bring specialized characters. Characters with Dynasty keywords may only be fielded if your list is fielding their Dynasty. The entire army must have the same Dynasty.

**Average:** This Dynasty uses the rules for models stated exactly as they are in this Codex.

### Maynarkh:

- Conquerors: All Infantry models in this army gain Objective Secured.
- Flayer Virus: All models in this army suffer Ld-2.

### Mephrit:

- Leaderless: Each model only counts as half a model for the purposes of Contesting and Claiming Objective Markers.
- Infighting: No unit can ever have more than one Character or Independent Character joined at any given time, or any Aura from more than one Necron Character or Independent Character affecting them at any given time.

- The Power of the Stars: All weapons that are not Tesla have the Rending special rule. If a model already had Rending, it may trigger on a 4+ instead of a 5+. This does not affect Auto Wounds or any other Wound that does not have a Roll To Wound. Necron Vehicles explode on a 4+ from this Dynasty.

#### **Nephrekh:**

- Abundant Precious Metals: Models in this army may reroll 1s on Armour Saves.
- Yearn for Pure Light Forms: All models gain Fleet but cannot Claim or Contest Objective Markers.

#### **Nihilakh:**

- Treasure Horde: All models in your army have Objective Secured for Objective Markers within your Deployment Zone.
- Isolationists: Your models cannot Claim or Contest Objective Markers inside the Enemy Deployment Zone.

#### **Novokh:**

- Ferric's Blight: All models from this Dynasty suffer Sv+1, resulting in 1 worse Armour Save. This does not affect Unique Characters.
- Blood Crazed: All models in your army gain Shock Assault and Furious Charge. This does not affect Unique Characters.

#### **Szarekhan:**

- Dark Origins: All models have I1, regardless of their Datasheet. Unique Characters are not affected by this.
- Blackstone Experts: Each unit of Infantry may attempt to Deny the Witch once per Round.
- King's Chosen: Every Infantry and Monstrous Infantry model has Bodyguard.

#### **Sautekh:**

- Aggressive Territory Grab: Models count as 2 models for the purposes of Contesting and Claiming Objective Markers that are not in an enemy Deployment Zone. Units eligible to declare charges must do so. They may still nominate to fire their weapons or advance, even if this invalidates the chance to Declare a Charge.
- Slavers: Characters and Independent Characters must accept all Challenges issued. If more than one eligible model is available, you may nominate which one accepts the Challenge.

<b>C'Tan Shard of the Nightbringer</b> Nightbringer	<b>M WS BS S T W I A Ld Sv</b> 8 2+ 2+ 6 8 12 4 6 10 -	<b>Points: 338</b> <b>Composition:</b> <b>1 C'Tan Shard of the Nightbringer</b>
<b>Wargear</b> <b>Nightbringer:</b> Scythe of the Nightbringer Necrodermis	<b>Options</b> May choose one C'Tan Power or randomly choose one each turn for +27 points	<b>Rules</b> <b>Nightbringer:</b> Monster Unique Living Metal Fearless Soulless Machine Death – Each time this model is nominated to fight in Melee, it inflicts an Autowound with AP2+ on each model in base contact, friend or foe. Gaze of Death – In the Shooting Phase, you may target a unit within 12". The unit takes a Ld test on 3d6, dropping the lowest die. For each point the Ld test failed by, the unit suffers an Autowound with AP2+. This overrides the normal AP- of Autowounds. If this does any Wounds to the target, the Nightbringer Heals 1 Wound as an exception to the normal Heal rules. Immune to Natural Law – Ignores models and Terrain for moving. May not fire Overwatch with C'Tan Powers. This model ignores the extra Wound it suffers from Monsterbane.
